

## Soft Care® Des E Foam

### Alcohol based hand disinfectant foam

#### Description

Soft Care Des E Foam is an alcohol based (71.58%) foaming hand disinfectant for waterless skin disinfection. Soft Care Des E Foam is suitable for use in all areas, including healthcare and food processing environments.

#### Key properties

- Soft Care Des E Foam contains 71.58% alcohol (68% ethanol)
- Soft Care Des E Foam is effective against pathogenic bacteria such as MRSA, yeasts and all enveloped viruses such as influenza. It is also effective against some nonenveloped viruses such as Norovirus and Adenovirus.
- Soft Care Des E Foam contains glycerol, a moisturizing agent that helps reduce skin dryness, so skin stays smooth and intact. This is particularly relevant in areas where frequent hand disinfection is required
- Soft Care Des E Foam has an aerated texture that is easily absorbed and quick drying.
- Soft Care Des E Foam has been dermatologically tested for superior skin compatibility (Patch test).

#### Benefits

- Contains ethanol, a highly effective disinfectant
- Fragrance and colour-free; suitable for use in the food processing industry
- Its foam texture eases product application and prevents spillages.
- Contains an effective moisturiser preventing skin irritation and dehydration

#### Use instructions

Apply up to 5 ml of Soft Care Des E Foam to clean, dry hands. Apply enough to keep the hands wet for 30 seconds. Rub hands thoroughly. Pay special attention to fingertips, nails and between the fingers.

*\*This dosage is according to optimal conditions, recommendations may vary, please consult with your Diversey representative for directions.*

## Soft Care® Des E Foam

### Technical data

Appearance: Clear, colourless foam

pH: 7

Relative density [20°C]: 0.86

40

*The above data is typical of normal production and should not be taken as a specification.*

### Safe handling and storage information
