# Tork Cleaning Cloth

510479

## Description

Keep workspaces spotless with our multipurpose cleaning cloths. Lighter tasks and cleaning hard-to-reach areas are effortless, thanks to their softness and high absorbency. They're a sustainable choice too – we've lowered the CO2 emissions for Tork exelCLEAN® cloths by 28% since 2011\* and made the packaging from recycled materials. The compatible dispenser's hygienic single-sheet dispensing allowing users to only take what they need, cutting wastage. \*(Life Cycle Analysis) LCA conducted by Essity and IVL Svenska Miljöinstitutet in April 2021

- Clean up dirt in hard-to-reach areas with this soft and flexible cleaning cloth, quickly and easily, saving time and effort
- Impress anyone visiting your premises with our hygienic alternative to unsightly rags.
- Improve your operation’s sustainability – this product packaging is made from 100% recycled fibres and at least 30% recycled plastics.
- Aviation certification
- Professional use
- Versatile
- Scratch-free shine
- Efficient

## Environmental Information

<b>Raw materials</b>	Cellulose Pulp Polyester Polypropylene Functional agents or additives
<b>Cellulose Pulp</b>	Cellulose pulp is produced either from softwood or hardwood coming from responsibly managed forests. The wood chips are boiled together with chemicals to remove the lignin between the fibres. The pulp is TCF (Totally Chlorine Free) or ECF (Elementary Chlorine Free) bleached in order to achieve a clean, bright and strong product, but also to increase the hygienic and absorbent qualities.
<b>Polyester</b>	Polyester fibre is produced from terephthalic acid and ethylene glycol, which react through condensation to polyester resin. The molten resin is spun to fibres through spinnerets and cooled with air. The fibers are then cut to intended fiber length.
<b>Polypropylene</b>	Polypropylene or polypropene is a thermoplastic polymer made from oil. The molten resin is spun to endless fibres through spinnerets and cooled by air. The fibres form a web.
<b>Functional agents and additives</b>	Functional additives could be wet strength agent, antistatic agent and wetting additives/tensides.
<b>Food Contact</b>	This product fulfills the legislative requirements for Food Contact materials, confirmed by external certification performed by a third party. The product is safe for wiping food contact surfaces and may also come occasionally into contact with foodstuffs for a short period of time.
<b>Environmental certification</b>	This product is certified for FSC® with certificate number SA-COC-008266.
<b>Packaging</b>	Fulfilment of Packaging and Packaging Waste Directive (94/62/EC): Yes
<b>Article creation date and latest article revision</b>	Date of issue: 01-12-2020 Revision date: 22-03-2025
<b>Production</b>	This product is produced at Suameer - NL mill and certified according to ISO 9001 and ISO 14001 (Environmental management systems).
<b>Disposal/destruction of used product</b>	This product is mainly used for industrial processes. When used in industrial processes the product might through use be contaminated with different substances. This will determine how the used product will be handled/disposed of/destroyed. The product itself is suitable for incineration. If used in industrial processes contact local authorities before destruction.
