

BUFFET & BREAKFAST DISPLAY

EcoServe Chafers

The safer, cleaner and greener alternative to existing gel and wick chafing products EcoServe offers the hospitality industry a modern approach to showcasing the kitchen creations. Available in two sizes and four colours venues can now style the look and feel of their buffets to improve their guest experiences.

- ✓ Faster set-up - ready within 10 minutes.
- ✓ Eco-friendly - Saves water, uses less carbon and less waste.
- ✓ Modular – you can build your buffet according to your needs

*Use with lid ECO5302

EcoBurner

EcoBurner simply slides into a clip under the EcoServe to provide portable heat. It was originally developed and is still used as a replacement to the toxic, chemical burners that are often used to keep food warm under chafing dishes. The EcoBurner is refillable and features patented safety devices that ensure staff and guests are safe from accidents.
