LINDA LEWIS TIZIANO PIZZA OVENS

The Tiziano range of ovens are designed to offer a wide range of equipment that will accommodate takeaways and small restaurants, where pizzas are only part of the menu, or those with limited kitchen space. They cook in around 3-6 minutes, depending on the thickness of pizza and whether you are cooking directly on the stone or in the pans.

The Tiziano is built with a control system consisting of two mechanical thermostats on each deck. This independently controls the temperature above and below the stones to ensure uniform cooking of the pizza both on the top and bottom.

2 YEAR PARTS & 1 YEAR LABOUR WARRANTY
